9.2 Plan Distribution

This plan shall be distributed in a manner that makes it available to as many interested citizens as possible. The final plan shall be made available digitally on the project web site (pdf format, downloadable by Chapter). It shall be available in print at all Delaware County Library branches and the Delaware County Soil and Water Conservation District Office. Copies may be requested and picked up at the Delaware County Soil and Water Conservation District Office (a nominal fee may be applied for personal copies in order to cover cost of printing). Additional copies shall be made available for public consumption as locations are suggested.

9.3 Evaluation and Adaptation of the WRWP Management Plan

The Delaware County Soil and Water Conservation District, as grant holder, shall be responsible for updating the WRWP Management Plan. This shall be accomplished with guidance from the public under the supervision of the designated Watershed Coordinator. This plan shall be updated no later than the completion of the first three-year implementation phase of this project. During said update, it will be determined what, if any, further or revised actions should be taken to move forward with the reduction and elimination of local sources of non-point source water pollution in the three studied subwatersheds. Such decisions shall be made in conjunction with stakeholders from each subwatershed, as well as other members of the public, as has been the case with the planning phase of this project.

9.4 Future TMDL Involvement

It is anticipated that several new and continuing TMDL studies are to take place during the first three-year implementation phase of this project. As before, the WRWP will make every reasonable effort to be an active participant in that process, both to provide IDEM with local information and to utilize their findings to better guide our implementation process. The designated Watershed Coordinator shall be the official contact person for the project.
