

CLIMATE

- Develop broad awareness of CLIMATE TRENDS and impacts
- Invest in WATER MODELING to inform local ordinances
- Support investment in RENEWABLE ENERGY sources

- Establish a CONSERVATION ETHIC about water use and irrigation
- Create COOPERATION PATHWAYS among neighboring communities

- Study water SUPPLY and DEMAND
- Increase home and business WATER REUSE practices

- Ensure safe and healthy RECREATIONAL CONDITIONS
- ACTIVATE waterways through programming
- Invest in QUALITY SPACES for health and well-being

DROUGHT

- Provide incentives to upgrade SEPTIC SYSTEMS or connect to sewer systems

- Promote widespread vegetated STORMWATER INFILTRATION practices
- Establish a CONSERVATION ETHIC about water use and irrigation

QUALITY OF LIFE

NEW JOBS

NEW HOMES NEW DEVELOPMENT

- Increase home and business WATER REUSE practices
- Promote widespread vegetated STORMWATER INFILTRATION practices
- Implement strict protections on WETLANDS and FLOODPLAINS
- Implement cooperative and complementary DEVELOPMENT ORDINANCES

- ATTRACT BUSINESSES and industries that bring new water technologies and talent
- Increase ECOTOURISM
- Study water SUPPLY and DEMAND to inform economic development opportunities

FLOODING

- Implement strict protections on WETLANDS and FLOODPLAINS
- Promote widespread vegetated STORMWATER INFILTRATION practices
- Invest in WATER MODELING to inform local ordinances

DRINKING WATER / TREATMENT PLANT

- Remove more CONTAMINANTS from drinking water
- Invest in INFRASTRUCTURE upgrades and repair
- Adopt regional SOURCE WATER protections

- Establish widespread adoption of SOIL HEALTH practices
- Improve agricultural DRAINAGE MANAGEMENT practices
- Ensure widespread MANURE and NUTRIENT management practices
- Increase education and TECHNICAL ASSISTANCE for agricultural producers

HOME / BUSINESS

AGRICULTURE

INDUSTRY / ENERGY

- Reduce pollution DISCHARGES, both contaminants and volume
- Invest in new TECHNOLOGIES to reduce water use and increase internal reuse
- Promote widespread vegetated STORMWATER INFILTRATION practices

ECOLOGY AND THE ENVIRONMENT

- Increase regional and statewide HABITAT planning and investment
- Reduce pollution from OUTFALL PIPES - storm drains and agricultural tiles
- Balance water use and LOW FLOW conditions with ecological and recreational needs
- Plan for rivers and streams to move and MAKE ROOM for them

WASTEWATER TREATMENT PLANT

- Invest in INFRASTRUCTURE upgrades and repair
- Increase REUSE or RESALE
- Eliminate combined and sanitary SEWER OVERFLOWS
- Promote the production of biosolid PRODUCTS and capture methane
