

RIVER REACHES

There are six sections of the river, each with a distinct character that contributes to the varied nature of the river experience.

COMMUNITY FOCUS AREAS

Several commercial corridors, historic districts, natural resources and cultural destinations were identified as catalysts for new or enhanced opportunities along this 58-mile stretch.

These focus areas are the result of your feedback in public meetings and online surveys, and in conversations with technical experts and community leaders. Many of the strategies and design proposals we will share today can be replicated in other places and destinations along the White River.
